PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and shipping production-grade web systems across enterprise, internship, and freelance environments. At PT. Anugrah Bangun Cahaya and PT. Ragam Tangguh Fortindo, independently developed 6 internal systems — including a multi-tenant Sales Force Application that scaled field operations from 3 to 20 depots. Completed 15+ freelance projects across e-commerce, property, and educational sectors. Graduated from Universitas Negeri Surabaya with a GPA of 3.90/4.00. Core expertise in React and Laravel, with strong command of RESTful API design, third-party integrations, and software development life cycle.

Teamwork, Communication, Multitasking, Problem Solving, Time Management, Leadership, Requirement Gathering & Analysis, Project Planning.

WORK EXPERIENCE

PT. Anugrah Bangun Cahaya & PT. Ragam Tangguh Fortindo - Programmer Specialist

September 2025 - Present

- Built a web-based sales commission calculator via CSV import, replacing manual Excel workflows and cutting calculation time by ~85% for 20+ sales reps.
- Developed a KPI dashboard integrated with Trello API, automating performance scoring for 5+ marketing team members and reducing reporting effort by ~70%.
- Architected a multi-tenant Sales Force Application (SFA) with mobile + web dashboard, replacing a third-party vendor and cutting licensing costs by ~60% — expanding depot coverage from 3 to 20.
- Built a WhatsApp broadcast system integrated with Accurate Online API to automate payment reminders based on ToP schedules.
- Developed a real-time sales monitoring dashboard consolidating Sales Quotation, Sales Order, and Delivery Order data into a single interface.
- Created a centralized document management system for 20+ affiliate and influencer contracts with searchable records and multi-user access.

Maxy Academy - Full-Stack Web Developer Intern

September 2024 - December 2024

- Contributed to a donation tracking platform improving transparency for donors and administrators.
- Owned full frontend and backend delivery of property sector client websites.
- Mentored 26 interns in a virtual program with structured feedback and weekly guidance.
- Contributed to building an LMS for an educational institution, reducing manual administrative workload.

PT. Otak Kanan - Full-Stack Web Developer Intern

February 2024 - June 2024

- Contributed to a HRIS platform development, owning 2 core modules: employee management and scheduling.
- Designed and implemented the scheduling module end-to-end, enabling managers to plan workforce shifts across the organization.
- Participated in agile cycles including code reviews, debugging, and deployment.

Freelance - Full-Stack Web Developer

December 2023 - June 2025

- Delivered 15+ projects across e-commerce, property, and educational sectors — managing full lifecycle from requirements to post-launch maintenance.
- Built responsive, scalable web applications using Laravel and ReactJS across diverse client industries.
- Translated client business needs into functional digital solutions through close collaboration.

ORGANIZATION EXPERIENCE

Badan Eksekutif Mahasiswa UNESA - Staff of Digital Transformation Department

March 2024 - Februari 2025

- Led full revitalization of BEM UNESA's official website, improving navigation and information accessibility for the student community.
- Produced and managed tech-related content for official social media channels to drive digital engagement.
- Organized technology-themed campus events, handling logistics and cross-division coordination end-to-end.

Google Developer Groups On Campus UNESA - Director of Research & Development Department

October 2023 - June 2024

- Led a division of 8 members, setting research direction and ensuring consistent progress toward departmental goals.
- Planned and executed 3 major tech events with 400+ total participants, driving knowledge-sharing across the campus developer community.
- Collaborated cross-functionally with other divisions to align initiatives and deliver shared organizational goals.

Himpunan Mahasiswa Teknik Informatika UNESA - Head of Interest & Talent Department

January 2023 - December 2023

- Led a department of 7 members, setting roadmaps, delegating tasks, and driving team development.
- Served as Full-Stack Developer for 3 organizational events, building dedicated event systems and websites from scratch.
- Contributed to multiple event committees across planning, monitoring, and execution roles.

Himpunan Mahasiswa Teknik Informatika UNESA - Staff of Interest & Talent Department

February 2022 - December 2022

- Conceptualized and managed student interest and talent programs as the department's core annual initiative.
- Actively contributed across committee roles including public relations, publications, and logistics.
- Coordinated cross-committee communication to ensure smooth and on-schedule event execution.
